Thank you for purchasing our product! Upon receiving the lighting, please carefully check that there has been no damage caused in transportation. If the lighting has been damaged, do not use the lighting and contact your dealer or manufacturer.

This product complies with the following standards:

IEC60598-1:2003

IEC60598-2-17:1984+A2:1990

Safety information

Important

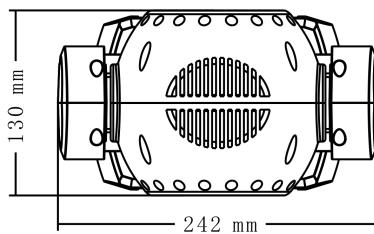

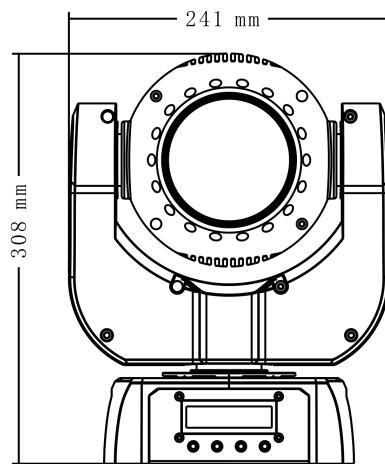

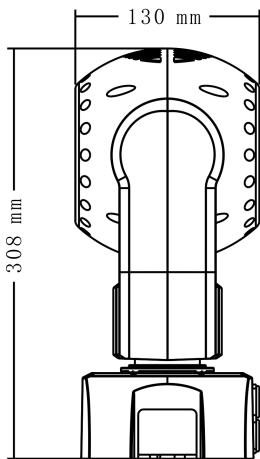

All operation and maintenance must be carried out in accordance with this user manual. Manufacturer will not be responsible for that operation not according to this Instruction:

- ◆ Verify that the voltage matches the rated voltage.
- ◆ The number of power supply plug connection lamps shall not exceed 10 units.
- ◆ Make sure power socket is connected with earth cable well. The earth cable of this unit is Yellow/Green one.
- ◆ Do not move or vibrate the lighting while the lighting is power on.
- ◆ Always disconnect the power before attempting to open the equipment housing or carrying out any maintenance.
- ◆ Do not connect power cable of other electric products with this unit.
- ◆ Do not expose the fixture to rain or moisture.
- ◆ Verify that the feed cables are undamaged and rated for the current requirements of all connected devices before use.
- ◆ Keep all combustible materials (for example fabric, wood, paper) at least 0.5 meters away from the light. Keep flammable materials well away from the fixture.
- ◆ Avoid looking directly into the light source (especially those who suffer from epileptic fits)
- ◆ When it is thunderstorm, don't use the light and disconnect the power supply, high voltage will destroy light.
- ◆ If the ambient temperature exceeds 40 °C, please do not use this light.
- ◆ When suspending the fixture above ground level, verify that the structure can hold at least

10 times the weight of all installed devices.

- ◆ Verify that all external covers and rigging hardware are securely fastened and use an approved means of secondary attachment such as a safety cable.
- ◆ Verify that all screws are tightly fastened.

|----------------|--|
| SET/ESC | Call the main menu, or escape the current menu (i.e. return to the upper menu and give up the selected item or parameter). |
| UP: | Browse the menu item forward or increase the parameter. |
| DOWN: | Browse the menu item backward or decrease the parameter. |
| ENTER: | Confirm the selected item or parameter(i.e. enter the next menu, or escape the current menu and save the selected item or parameter) |

Common operation

Run if there is no signal in DMX mode

When the lighting is in DMX mode, and shows the stored DMX address,

Press ENTER, shows **DMX** (DMX menu)

Press ENTER

Press UP or DOWN to browse to **AUSO**

Press ENTER

Press UP or DOWN to browse to **Stop Run** (stop) / **Hold Run** (hold) /

Auto Run (auto)/**Sound Run** (Sound)

Press ENTER to confirm

Selecting channels mode

When the lighting is in DMX mode, and showing the stored address,

Press ENTER, shows **DMX** (DMX menu)

Press ENTER

Press UP or DOWN to browse to **DMX Channels**

Press ENTER to **STAG Mode**

Press ENTER to browse to **16/13/8/6**

Press UP or DOWN to browse, Press ENTER to confirm

Manual dimmer

Power on, the lighting shows A001

Press UP or DOWN buttons to browse to **manual dimmer**,

Press UP or DOWN buttons to browse to the flowing menu

| | |
|-------------------|-------------------|
| Red | Red dimmer |
| Green | Green dimmer |
| Blue | Blue dimmer |
| Yellow | Yellow dimmer |
| Cyan | Cyan dimmer |
| Purple | Purple dimmer |
| Pure White | Pure White dimmer |
| All White | Mixed white |

If you want to adjust one of above items, Press ENTER buttons to enter and adjust by pressing UP and DOWN buttons, then press ENTER to confirm

Run built-in programs

Power on, the lighting shows A001,

Press UP or DOWN buttons to browse to **manual dimmer**,

Press Enter buttons, the lighting will run the built-in programs

Chang Color Automatic 1

Twinkling Automatic 2

Fade Automatic 3

Run programmable macro

Power on, press UP or DOWN buttons to browse to **MACRO**

Press ENTER buttons to enter can browse to the below menus:

1. **Step Quantity** (adjust the program quantity)

2. **Program Step** (program steps number)

Macro call the built-in programs circularly, each step is one of built-in program.

This menu is used for setting the steps number. If the number is set to 3, so the lighting runs 3 built-in programs circularly ,when use UP and DOWN buttons to browse the menu , you just can see 3 step:**ST01**, **ST02**, **ST03**. The number could be set to 62 mostly.

3. **ST01**(choice menu of the 1st step)

Press ENTER-button , then use UP and DOWN buttons to browse to your desired built-in program including **Change Color**, **Twinkling**, and **Fade**, press ENTER-button to assign one of the built-in programs to Step1 or press SET button to cancel and return .

4. **ST02**(choice menu of the 2nd step)

Press ENTER-button , then use UP and DOWN buttons to browse to your desired built-in program including **Change Color**, **Twinkling**, and **Fade**, press ENTER-button to assign one of the built-in programs to Step2 or press SET button to cancel and return

... ...

e.g.:

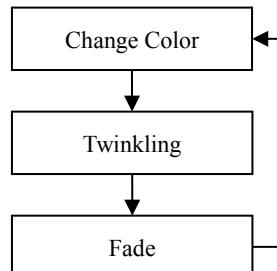

Set steps number to 3

ST01 choose the **Change Color** program

ST02 choose the **Twinkling** program

ST03 choose the **Fade** program

The program runs as right figure.

Reload manufacturer's Data

Press SET-button until displays **SET** (Set menu)

Press ENTER

Press UP or DOWN to browse to **Load Parameter**

Press ENTER

Press UP or DOWN to browse to **ON** (reload)/**OFF** (do not reload)

Press ENTER to confirm.

Stand-alone mode

In Stand-alone mode, the lighting out of control of any exterior signal, run solely. Setting method is:

Press MODE-button until shows **SET** (set menu)

Press ENTER-button

Press UP or DOWN-button to browse to **Master / Alone**

Press ENTER-button

Press UP or DOWN-button to browse to **ALON** (alone)

Press ENTER - button to confirm.

Master/Alone mode

① When signal hand in hand ,one unit needed to be set to Master mode, and then the other fixtures are default to be slave mode, then all the lights follow the master sync operation.

1. Setting Master-device

Press MODE-button until shows **SET** (set menu)

Press ENTER-button

Press UP or DOWN-button to browse to **Master / Alone**

Press ENTER-button

Press UP or DOWN-button to browse to **MAST** (master)

Press ENTER - button to confirm.

2. Slave-device setting

Press the lighting to DMX mode position.

Set Auto /sound mode

The steps to set Auto/sound mode

Press MODE-button until shows **SET** (set menu)

Press ENTER-button

Press UP or DOWN-button to browse to **Auto / Sound**

Press ENTER-button

Press UP or DOWN-button to browse to **Auto Mode/ Sound Mode**

Press ENTER - button to confirm.

DMX mode

In DMX mode , the lighting can controlled by controller. When the display shows A001 or the other actual stored addresses .the lighting is in DMX mode.

Setting DMX start address

In DMX mode, a fixture requiring one or more channels for control begins to read the data on the channel indicated by the start address. For example, a fixture that uses 3 DMX channels and was addressed to start on DMX channel 1, would read data from channels: 1, 2, 3. Choose start addresses so that the channels used do not overlap, and note the start address selected for future reference. Note that assign the same address to the different lightings, they will receive the same signal.

Setting DMX address method:

When the lighting is in DMX mode, and showing the stored address,,,

Press ENTER, shows **DMX** (DMX menu)

Press ENTER

Press UP or DOWN to browse to **ADDR**

Press ENTER

Press UP or DOWN to set DMX address

Press ENTER to confirm

ID addressing

ID code is used to extend DMX. Any DMX address in the range from 001 to 512 may be used, so

a limited fixtures are controlled by DMX controller respectively in a series. However, the ID code function allows each DMX address may carry up to 66 separate ID addresses, so 66 fixtures could be respectively controlled with the same DMX address. For example : if the controller can control 63 fixtures in series , and the ID code function extend the quantity to $63 \times 66 = 4158$. Enter SET menu and find ID menu could set the ID code. ID addresses are accessible from CH4 on the DMX512 controller. If you don't want ID code function, CH4 must be inactive (CH4=0).

DMX channel

This lighting has four channel modes, they can be selected in the DMX menu, the default setting is 17channels mode.

17 channels mode (default)

| Channel | Value | Function |
